

# WHG - Telematics and Application Service Certified

WHG Announced as TCA Certified Application Service Provider with TCA Type-Approved Telematics Device.

**WHG**  
Passionate • Innovative • Technology

In a pivotal step for fleet management technology, Australian-operated WHG is thrilled to announce Transport Certification Australia's (TCA) type-approval of WHG's Telematics device to meet IVU Standards. Available as a standalone Telematics solution or integrated with other modules such as Smart OBM sensors, camera telematics, electronic work diaries, tyre-pressure monitoring systems, driver ID monitoring and IoT intelligent tags. This recognition and approval demonstrates WHG's commitment to provide leading, fully connected technology, guaranteeing premier accuracy, security, compliance and interoperability in transport management.

After more than 35 years, consistently pushing the boundaries, WHG remains steadfast in delivering world-class telematics solutions, with complete engineering and support backed by our in-house Australian team.

## WHG: A True Aussie Telematics and Fleet Management Marvel

Developed with versatility at its core, WHG is adept at overseeing fleets of any size. WHG's expansive range of IoT technology widens its monitoring to include other treasured assets within a fleet. Users benefit from advanced features like high-definition tracking, intricate journey reports, driver scores, custom reports, dashboards, and alerts, as a fully managed service.

Furthermore, the WHG iLink platform facilitates seamless incorporation of additional modules such as service data, mass management data, tyre pressure information, integrations via APIs and much more. The WHG iLink platform ensures all-round safety and productivity, in one central solution, this redefines fleet management and significantly reduces downtime with diagnostic and maintenance attributes.

***"Our business has been built on the success of our products and technology in the international markets, with our attention now moving to secure and lead in the Australian space. As a business we are differentiated by our products and the superior service we offer. Our technology is designed and developed in Melbourne, where we offer full support locally from engineering, software development, customer support, accounts and administration. With a team of WHG technicians Australia-wide, we look after installation and implementation..."*** Dylan Hartley, WHG's Director of Operations.

Incorporating feedback, plus local and international standards, WHG emerges as the ultimate solution for fleet management. The TCA certification encompasses WHG's telematics device, and their Smart On-Board Mass system; FleetWEIGH Smart Scales (developed in partnership with Trail-Link), making WHG the first certified service provider to offer both technologies in a single service offering.

The transport industry accentuates the need for dependable and accurate telematics solutions. As not all in-vehicle units fulfil anticipated standards in terms of accuracy and security. Meeting the TCA IVU criteria, WHG assures unparalleled precision and reliability.

***"In Australia as a market we are saturated with Telematics providers who offer inferior products, that do not deliver. Through education we hope to see a change in our industry with fleet and transport customers rallying around TCA approved providers who have undertaken the rigorous approval process and made the investment to demonstrate their reliability and performance. We look forward to growing on the 35 Years of success that has positioned us as a market leader."*** Mr. Hartley said.

As WHG steers forward, championing its Australian focus, TCA's certification of WHG as an Application Service Provider (ASP) for both Telematics Monitoring Application (TMA) and Road Infrastructure Management (RIM) applications under the National Telematics Framework solidifies its determination to render dependable and trailblazing solutions.

The fleet and transport industry can remain confident in WHG's commitment, reinforced by our Australian-wide services, delivering pioneering telematics solutions, **Passionate, Innovative, Technology.**
